

Windows 7 – Shell Commands

Über einen Registry Eintrag sind wir in der Lage jeden Shell-Befehl direkt über einen Rechtsklick aufzurufen.

Dazu erstellen wir einen neuen Registry Key und importieren ihn per Doppelklick.

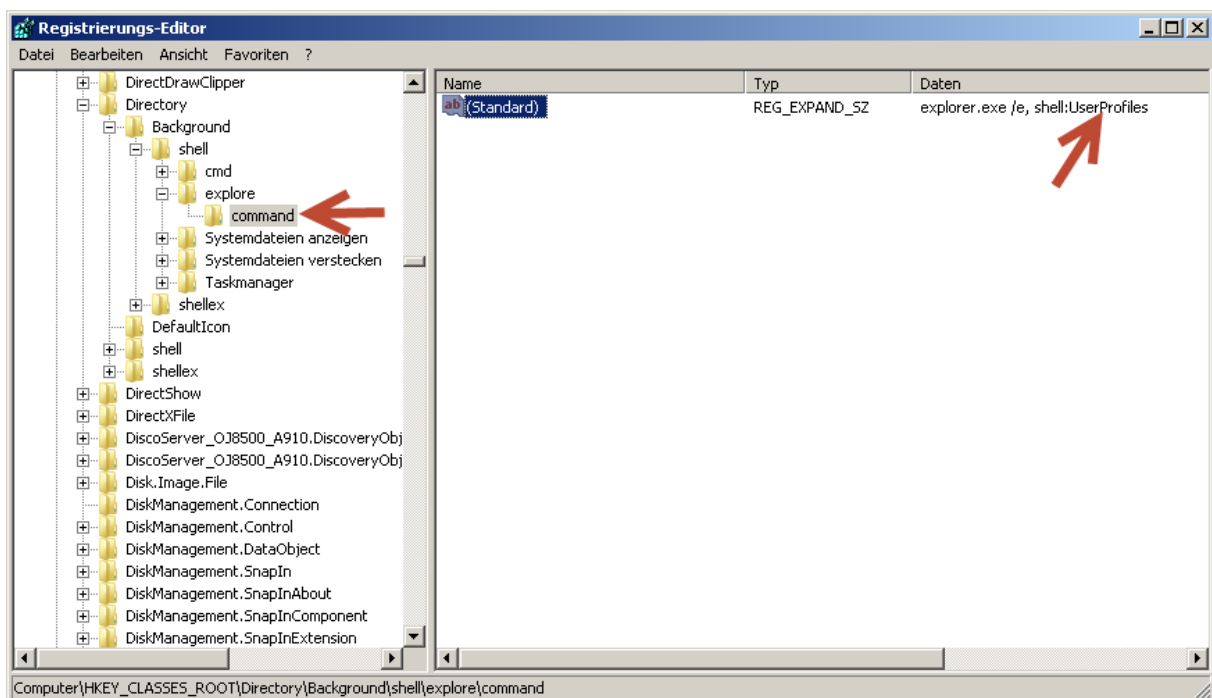

Windows Registry Editor Version 5.00

[HKEY_CLASSES_ROOT\Directory\Background\shell\explore]

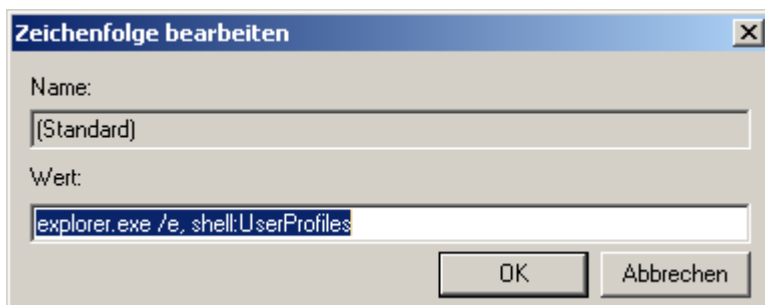

[HKEY_CLASSES_ROOT\Directory\Background\shell\explore\command]

@=hex(2):65,00,78,00,70,00,6c,00,6f,00,72,00,65,00,72,00,2e,00,65,00,78,00,65,\
00,20,00,2f,00,65,00,2c,00,20,00,73,00,68,00,65,00,6c,00,6c,00,3a,00,64,00,\
65,00,73,00,6b,00,74,00,6f,00,70,00,00,00

Den Wert können wir über die Registry direkt bearbeiten.

Dazu klicken wir die Zeichenfolge doppelt an und bearbeiten diese. Um einen anderen Shell-Befehl auszuführen ersetzen wir Desktop durch **UserProfiles**

Windows 7 – Shell Commands

Neue commands in Windows 7 zu Windows Vista

- ✦ shell:Libraries
- ✦ shell:MusicLibrary
- ✦ shell:VideosLibrary
- ✦ shell:OtherUsersFolder
- ✦ shell:Device Metadata Store
